

Position Statement European regulation REACH (EC) 1907/2006

Eldra declares that its products are compliant to the European regulation REACH (EC) 1907/2006.

As a downstream user of raw materials, Eldra produces “articles” and “preparations”, that do not require registration according to the REACH regulation.

Our products, however, may contain raw materials which should be REACH classified. Therefore, Eldra has notified all its suppliers that the “substances” or “substances in preparations” supplied to Eldra must be preregistered before December 1st 2008. Furthermore, these suppliers have been asked to confirm their REACH compliance to Eldra before this date.

When releasing new raw materials, compounds or products, Eldra will ensure REACH compliance through statements from suppliers and/or Material Safety Data Sheets (MSDS).

Non-registered materials will not be purchased or used in our products according to the schedule of the REACH regulation.
